## Customer Reviews

"The Feedback Loop" is the first in a Sci-Fi series by author Harmon Cooper. This Kindle e-book was approximately 190 printed pages and sold for \$0.99 at time of writing this review. Please Note: I was provided with an ARC of this book in exchange for an honest review. General Theme (minor spoilers) Quantum Hughes is a video gamer... a good one. And the one he's been playing lately, Cyber Noir, has just about everything he could ask of a game. A decent plot, many NPCs to interact with, some cyber-sex, a variety of weapons, and killing... lots and lots of killing. By all standards, Quantum's definition of THE perfect game. The problem is, that somehow he's gotten trapped inside the game and can't get out. He's been stuck in an endless loop of the same repetitious scenarios for years... all the while looking for his savior, that elusive 'log-out' button. And then one day, something different occurs... Some thoughts on "The Feedback Loop"... 1.) well written and edited... there was the occasion typo, but then this was an ARC. 2.) a different yet intriguing, over the top plot. 3.) lot and lot of action... gruesome and gory in its description, and coming at you with a seemingly endless and fresh ways to die... but somehow perfectly balanced and in keeping with the crux of the story being told. 4.a) our hero, Quantum Hughes... really a great character that has many personality quirks and unusual traits. I guess living inside a video game might do that to you. 4.b) in addition to Quantum, there are a few other characters that play various parts in his trapped existence. 5.) cover art...
