I had a difficult time choosing a program that was right for me, gaining acceptance into a nursing program & then passing the extremely difficult nursing program and NCLEX examination. I was also very concerned, because I really wanted to become a nurse; however had a C average in high school and had taken a 5 year break since graduation. In addition to that, I was told in the 8th grade that I had a learning disability and was held back an entire year. So when I made the decision to find a way to become a nurse, I knew the odds were against me. However, I learned a few key study tips & techniques that I will share with you in this book which enabled me to start nursing school with a 3.7 gpa and also graduated nursing school with honors. ## Customer Reviews

I read this to assist me with school in terms of organization and at the end of the semester I realized that what mattered the most was what worked for me. This book presents with good ideas, yet do what works for you overall to help you help yourself through RN school.

I'm a combat medic and i have done from simple suture to shrapnel extraction and treating a simple flu to treating renal failure. Initially, I wanted to be a PA, but this book made me discover i want o be a Nurse.

In so many ways, she has helped me to move forward as a nursing student, whose still got a really long way to go in becoming a certified BSN nurse. Im currently at a community college, who still need to get accepted into a nursing school, take and pass the NCLEX exam, and receive a BSN degree. Although I'm currently not attending a Nursing school at the moment, I still found this book really useful to me, as a college student aspiring to be a nurse. I'm a student whose currently

struggling with lack of interest and study skills in science courses, have a really low GPA, and is no longer motivated to do well in school, since I have continuously tried and had many failed attempts to achieve my academic goals in school. Reading this book allowed me to change my mindset with my anxieties as a student in college, while I'm taking the most rigorous science courses for Nursing majors. Caroline also taught me some really specific and useful study skills to use in not just only for nursing, but applicable in other non-nursing courses as well. (It may be already obvious to some readers, who are already really studious and on top of their studies and schedule.) Lastly, I've learned how to take care of myself and my overall well-being while in college.

Great book for someone who is thinking about the career or would like some motivation and study tips. Should be required N101 reading. It was a quick read and I will go back and check out some stuff in it again.

Caroline specifically outlines and writes in detail about her experience and gives you a picture right off the bat with what her experience was like and definitely tries to relate to how many students are feeling entering school or if they are struggling during the first few months. I bought this book when I was accepted in a Nursing program. I went on YouTube to try and look up various nursing vlogs about any information that I could have right away. I came across Caroline's, and ever since I started following her she has been nothing but extremely helpful and has always tried to answer any question I have regarding nursing. This book I would definitely recommend to anyone even considering Nursing because the information that Caroline includes just makes you so excited and pumped up for being a great nurse. She has truly had an impact on my life and really shows in her work that she truly cares about helping others succeed and move forward with great motivation. The book takes you step by step through different phases and answers many questions that many individuals have in common. It's a very easy read, and I've read and reread it a few times now and I find something helpful every single time. THANK YOU, CAROLINE!

Very inspirational and motivating. Easy to read, has lots of studying tips and techniques. The author is down to earth, the "girl-next-door", telling her own story of how she went through the whole process - from starting just dreaming about becoming a nurse, taking prerequisites, going through the nursing school, and then passing the NCLEX at the end with an excellent score. Her journey from the decision making of what kind of nurse you want to become, what there are differences of nurses in the nursing field, the organizing tips, the simple forms of daily planning, the worries and

anxieties she had to deal with. She also gives names of motivational speakers that she is listening and the websites she is using. Would highly recommend to anyone who is going, already in, or done with the Nursing School and getting ready to take the NCLEX.P.S. Paperback is better. You get to carry it around and underline with your pencil, write in it, fully own it and use it many times and at the best satisfaction level. ;-)

The book is great, what I expected! A lot of great points and advices I wouldn't think about myself, great book to read before getting into the nursing program, love it, keep up the great work, great for motivation too!

I watched her YouTube videos before and decided to read her book during my summer break! Well, I am so glad I did! Whether you're a HS, pre-nursing, or nursing student, I would definitely suggest you purchase this! It's such a great book! Helpful tips and wonderful advice. I find it amazing how Caroline put in all her time & devotion into this book to help & guide others. She's truly an inspiration. Using her study tips and guidance, I'll definitely strive to be an honor student just like her during my first semester of NS! Thanks Caroline, love ya :)
