Application Of Impossible Things: A Near Death Experience In Iraq

Synopsis

This is an amazing true story of a female civilian employee of the Army Corps of Engineers in Basrah and Nasiriyah, Iraq. She was riding in a truck with other men when a roadside bomb destroyed the vehicle. Her body was so severely damaged that there was no possible way she could live. She vividly recounts her Near Death Experience when she went out of the body to the spirit world. There it was decided that her work on Earth was not done and with the help of spirit guides, they repaired the body so she could reenter it. She retained the conscious memory of what happened and during the time in the hospital, more details returned. This is the amazing story of a survival in wartime conditions. This has happened to many others in Iraq, but how many remember the spirit side of the experience? Before this experience, Sudman was dubious about anything that smacked of the paranormal. This experience made her a believer. She shares her story here for the first time to demonstrate that the paranormal is normal and to assist others who have had similar experiences. This is a book for anyone interested in near death experiences and out of body experiences. It is one of the first such book to come out of the Iraq conflict.

Book Information

Paperback: 128 pages

Publisher: Ozark Mountain Publishing, Inc. (March 30, 2012)

Language: English

ISBN-10: 188694024X

ISBN-13: 978-1886940246

Product Dimensions: 5.4 x 0.4 x 8.4 inches

Shipping Weight: 3.2 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (159 customer reviews)

Customer Reviews

The morning I received this book in the post I put it to one side with the intention of reading it in my next coffee break. A few coffee breaks of reading this book I thought would probably allow me to finish it with ease. Three weeks later however I was still reading. What I am making reference to is the somewhat lightweight appearance of the book. Whilst noticing an attractive and appealing front

cover design and a somewhat intriguing title, I had to admit to myself - I had seen bigger books! This however turned out to be a classic case of appearance vs. reality. The book was not a quick read by any means, even for a relatively fast reader such as myself. Moreover it was challenging, conceptually weighty, witty, engrossing, intriguing, and had plenty of both substance and style to it. In the preface of the book the author relates how she initially hesitated over the idea of publishing a book discussing her near death experience. Observing the already substantial literature currently available in bookstores she questioned the virtue of adding yet another NDE book to the bookshelves, wary of an already saturated market for this genre of book. Her final choice, to publish anyway, was a good one. This was no doubt due to the realization that she had something genuinely original and fresh to offer this particular genre. For someone such as myself, already familiar with transcendental NDEs (and by transcendental I mean more extensive than simply 'popping' out of the body, observing what color tie that cardiologist was wearing and 'popping' back in the body again) this book still managed to provide further improved understanding of many of the metaphysical concepts I had come across in previous similar publications.
