# AMERICA ALONE: The End Of The World As We Know It

## Synopsis

It's the end of the world as we know it...Someday soon, you might wake up to the call to prayer from a muezzin. Europeans already are. And liberals will still tell you that "diversity is our strength"--while Talibanic enforcers cruise Greenwich Village burning books and barber shops, the Supreme Court decides sharia law doesn't violate the "separation of church and state," and the Hollywood Left decides to give up on gay rights in favor of the much safer charms of polygamy. If you think this can't happen, you haven't been paying attention, as the hilarious, provocative, and brilliant Mark Steyn--the most popular conservative columnist in the English-speaking world--shows to devastating effect. The future, as Steyn shows, belongs to the fecund and the confident. And the Islamists are both, while the West is looking ever more like the ruins of a civilization. But America can survive, prosper, and defend its freedom only if it continues to believe in itself, in the sturdier virtues of self-reliance (not government), in the centrality of family, and in the conviction that our country really is the world's last best hope. Mark Steyn's *America Alone* is laugh-out-loud funny--but it will also change the way you look at the world.

## Customer Reviews

At least, that's how he signed my copy. I'd call Mark Steyn's essay the single best distillation of the challenge posed to the West by radical Islam that I have ever read. Regular readers of Mr. Steyn will not be unfamiliar with his central points:1) In the ongoing conflict between the West and Islam, both

the demographics and the will to power favor the Islamists. That a country like Spain, with a birth rate of 1.15 children per adult women, will extinguish itself in a few generations, while immigrants from countries such as Pakistan (birth rate 4.53) will move in to fill the vacuum.<sup>2</sup>) That as an aggressive, unassimilated minority edges closer to a majority (as in France, with an estimated 30% Muslim population in the under 20 age group), the character of the democratic institutions will become more closely aligned with Islamic law and culture.<sup>3</sup>) That the post-Christian welfare state is largely to blame for the pessimism and failures of will demonstrated by Europe.<sup>4</sup>) That America represents the primary exception to this trend, if only by degree, and that only a concerted effort to save our society stands a chance of reversing these trends. That's a reasonable prognosis of Steyn's book, and he is certainly not unique in either his diagnosis or his prescription for the West. What sets this apart is his writing. The argument is made in a way that is the most engrossing and entertaining presentation of these ideas I've ever read. Steyn, as part of his superhuman writing regimen, is the obituarist for The Atlantic Monthly, and he puts that talent on display. This is not just a description of a set of demographic realities, but a loving, if premature (he hopes), obituary to a dying great culture.

Why has Mark Steyn's book "America Alone" been labeled "alarmist" by his opponents? Look at the title: America Alone. Its meaning is obvious, but concerning what? When the Soviet Union fell, America was left standing as the sole super power in the world. But that is not the meaning of America Alone. However, do you remember what Nikita Khrushchev said? America would fall from within, without one shot fired. America would destroy herself through societal softness and the Soviets would walk in and take over. Steyn states that Muslims have adopted this concept of a country falling from within, beginning in Europe. Through immigration, Muslims are establishing themselves as a stronghold. Belgium, Sweden, England, Denmark, the Netherlands, and France are on their way to becoming majority Muslim and geo-political. In fact, he says, Eurotopia is fast becoming "Eurabia." Three events are rapidly leading to Eurabia: 1. Demographic decline 2. The unsustainability of the advanced Western social-democratic state 3. Civilizational exhaustion Do you remember years ago forecasters urged population control? Europe heeded this warning and now faces two factors that will change it drastically: its population is aging and couples are not reproducing themselves. According to Steyn, these are the statistics of the population under the age of 15: Spain and Germany--14%, United Kingdom--18%, the United States--21%. On the other hand Saudi Arabia's 15 and under is 39%, Pakistan--40%, and Yemen--47%. Who is reproducing themselves: the US at 2.1 babies per couple, [...] at 7.46, Mali at 7.42, Somalia at 6.76, Afghanistan

at 6.69, Ireland at 1.9, New Zealand at 2.11. There are Germany and Austria at 1.3, Russia and Italy at 1.2, and Spain at 1.1.

Mark Steyn, like P.J. O'Rourke, is an extraordinarily insightful and witty communicator who is not only an artist in the tapestry he weaves with words, but who has keen and piercing discernment into one of the most pressing issues of our time: the shockingly rapid and rabid advance of virulent violence in the name of religion. Thankfully, unlike many lily-livered and wrong-headed authors of today, Steyn does not grant moral equivalency between faiths that promote peace and love, with faiths that promote hatred and terror. Steyn tells it like it is, and focuses on the real, specific threat to us all: the spread of Islamist extremism (differentiated from peace-loving Muslims). This aggressive terror movement quite literally threatens the very existence of Western Civilization and the freedoms of every single person reading this review. Having been to Europe on several occasions, including recently, I can say that Steyn's observations about the encroaching threat are right on. Recently, French law enforcement officials have gone so far as to call for help, noting that what Islamist extremists and hoodlums are waging against them in France is an actual intifada. The Netherlands, also overwhelmed with angry immigrants who refuse to assimilate, is likewise facing an epic clash of cultures. In the UK, key cities are on the brink of becoming majority Muslim--a frightening percentage of whom believe that terrorism is a viable, moral option. Could this happen in America? In fact, the seeds have already been planted. If you have been unaware or dismissive of this fact, then you absolutely must get Steyn's book and read it immediately. This is not a book about partisanship.
