Green Kills: A Medical Thriller (Mystery & Murder)

Synopsis

The CEO of a promising start-up company is found dead in a luxurious hotel room. Two men who underwent what were supposed to be simple surgical procedures died on the operating table in two different hospitals. Are the deaths related? Ronnie Saar, a newly promoted partner in a leading venture capital fund, is unexpectedly nominated to chair the board of a successful pharmaceutical startup company. But before he can reap the rewards of his promotion, he must deal with these unexpected deaths and other ominous developments that threaten his and his soon-to-be bride lives. His attempts to get to the truth expose a bitter reality: In the business world, money is more valuable than human lives.

Fast-paced thriller Ronnie has a lot to lose. His job, the bright future with the woman he loves and if not playing it safe – his life. Everybody around him offers the same advice – “sell and move on with your life. But as his best friend Gady, a former military investigator in the Israeli army, discovers – things are not what they seem. A mysterious and powerful player has his own plan and he has no intention to stop until it is accomplished.

Green Kills is a fast-paced thriller with a complex plot exposing what goes on behind closed doors at the big money making firms. It leads the reader down the complicated path of venture capital funds’ decision-making, all the way to the unexpected finale. The author is an experienced and successful high-tech entrepreneur who also worked more than thirteen years as a venture capitalist in Israeli and American venture capital funds. This book provides an intimate look behind the scenes of the mysterious "high-tech" world. Scroll up and grab a copy today.

Customer Reviews

I am a lawyer. If I did not know otherwise, I would be willing to swear Avi Domoshevizki is a lawyer too. I was impressed by his accurate and professional descriptions of legal negotiations and processes as well as his deep knowledge to the smallest details. Yet, sticking to the details does not derogate from the thrill and suspense of the plot. There is not a single dull moment throughout the whole book. That's what I call a professional at work. Green kills is an imaginary thriller but I still cannot get rid of the nagging thought "can the scenario the author describes happen in the real world?" A frightening thought I must admit.

Title - Fast pace medical thriller I don't know about you, but I thought venture capital's job is to give talented people money, pray and if the venture ends up as a success story, make sure to receive all the glory. Well, Green kills adds other types of risks, lethal ones, into the picture so it changed my mind. The job is probably by far more complicated. Especially if one, like Ronnie, who has his own strong beliefs, has to think out of the box in order to overcome continuous unexpected difficulties, while being unfamiliar with the word "impossible" or "for your own sake - don't interfere". Green kills is a story about a medical startup company (btw, with a great product - my compliments to the author), venture capital and crime. But also about passion, love and friendship. Domoshevizki uses all those ingredients to cook for us a fascinating dish, one that is very difficult to stop reading. The ingredient most appealing to me is the fact that there is really a sophisticated riddle behind the mysterious and dangerous plot that keeps you wandering throughout the book - "how could it be done". Warning: do not start reading it in the evening. You will probably won't get your full night sleep.

It usually takes me quite a few weeks, if not longer, to finish a book given my busy schedule. This is the first time I recall picking up a book in the afternoon and not setting it down until it was finished reading later that evening. A true thriller, filled with twists, surprises, evolving characters and non-top suspense until the very end. Definitely and absolute must read for anyone involved in the hi-tech industry, and just as equally must for anyone wishing to understand the behind the scenes of the startup market and the venture capital industry that feeds it. The story is so real, accurate and

vivid that it immediately reminded me of some of the great periods I had in the early days of my first start up, with Avi as my first investor, mentor and guide. Pick it up and read it - guaranteed pleasure and you will definitely not regret it...

The story is, indeed, a fast-pace thriller. An excellent plot that keeps you awake and tuned to the next page and twist. It seems that the novice author has succeeded â “ twice in a row â “ to produce a masterpiece. Pity it is only lasted 338 pagesâ | :- (Great value, a must!

Green Kills is a great story. A suspenseful story built around the investment industry, the author is kind enough to include the occasional explanation of common processes, procedures, and practices for those of us who aren't familiar. I found these interesting, and was able to draw some parallels with other industries with which I am more familiar. These tidbits of seemingly side information also give important insight into the motivations and machinations of the characters and plot events. I enjoy how the author seamlessly integrates secondary characters who provide important information to unraveling the plot mystery without awkwardness or seeming artificially convenient. In addition, the characters are genuinely likable, DISlikable... or flat out scary. Now that I've told you about the character constructs, I'll say this: (NO PLOT SPOILERS FROM ME!): The story is a thoroughly enjoyable tale of a man with a perfect life who finds himself in a serious pickle. Unsure what is happening, including whether he's being set up, he proceeds with caution and the counsel of good friends. Eventually finding himself, those he cares about, and colleagues in serious jeopardy, he keeps his wits about him to figure things out, managing to get through (almost) unscathed... I received this book in exchange for an honest review. Any opinion expressed is mine alone.

Avi Domoshevizki is the author of this book and he out did himself. I have seen my fair share of attorney's but Avi made it clear he knows a lot about law. His knowledge alone some lawyers don't even go thru the great lengths on details but Avi did. I found myself more than several times trying to put the book down but couldn't it had so much suspense and action. I believe you have to have the heart to be in investments and I don't think I could or would go into this field. You have to think outside the box a lot or you will find yourself like some of these characters. So enough said you must read this book to understand what it's about so no more me telling you about the book. It's full of suspense and thrill it will keep you edged in of your seat and just when you think your about to relax NOPE I received this book in exchange for an honest review. Any opinion expressed is mine

alone. When you think that money is so important you have to rethink your situation.
