Dreams Of Gaia Tarot: A Tarot For A New Era

Synopsis

The philosophy of the "Dreams of Gaia Tarot" is simple: to seek, to feel, to grow, to heal. This deck will strengthen your connection to your divine self, while helping you to identify and heal past experiences that hold you back from living to your fullest potential. Learn to recognise when times of growth and change are approaching, and face them with confidence and a sense of anticipation. Learn when to take action, and when to be still. Learn to trust in your intuition. By offering structure in the form of a major and minor arcana like that of past tarots, but combining them with bold new archetypes, symbology, and meanings more suited to the present, the "Dreams of Gaia Tarot" allows for a more personal, intimate, and effective system for using cards as a roadmap to navigate your life path. Embark on this extraordinary journey of undoing, of being, and becoming, and be inspired by the knowledge that all that manifests in your future is born of choices you make today.

Customer Reviews

I was so excited to receive this deck after pre-ordering it back in early June. It was frustrating to hear from friends who just ordered it this week on a whim that they received theirs before me but I finally got mine today. What a strange disappointment. While the art of Ravynne is undeniably beautiful, the production quality is inexplicably poor. And I mean that literally - I can't explain some of these issues logically: 1. I opened the shrink wrapped sturdy outer box to find the inner box corners mysteriously ripped/crushed and all of the card corners bent. 2. The card stock is VERY thin (I don't know what kind of decks these other reviewers are used to using but these would NOT hold up very long to regular readings). This would explain not only the bent corners in the cutting process

but also some cards having creases in them toward the top - probably indentations from misaligned cards in the production process (yes, that's how thin the card stock is).³ The lack of any design on the back, other than a thin yellow line, makes the completely misaligned trimming job all the more obvious. The margins on one side are much bigger than the other on quite a number of the cards.⁴ There are also some cards that have a weird problem with the black finish that makes them appear to have grey spots and you can also feel rough patches on some of the cards amidst the ostensibly completely slick finish on both sides.⁵ Most perplexing of all is that a handful of cards *in the middle of the deck* had really bad water damage along the bottom (some, all the way up through the very large titles)! I have no earthly idea how this could happen prior to packaging/quality control.

Amazing! The artwork is so powerful, using words to describe it seems futile. The rich color saturation, depth, detail, and black background draws you in to the images. You can actually feel the intensity of the pictures as you gaze at them while your mind and soul absorb the energy through your eyes. As a work of art this deck is unmatched, completely unique, and penetrating. This is not your mother's Tarot! While this completely innovative system does not follow the traditional Tarot, there is a logic that follows a path of progression that is very easy to understand. Although the system is different and will require some study, I was able to yield an accurate and insightful reading right away. With a 308 page accompanying book you have plenty of guidance to help you understand the intention behind each card. There are notes on how to interpret the majors from a past, present, and future perspective while the minors have an additional note on potential blockages. What the artist has not done is tell you exactly what the imagery itself means, giving you the reader an opportunity to experience your own intuitive guidance. I've not seen many deck creators who are also the artist, and that in itself sets this one apart from other decks. The cards are the perfect size in order to show the detail of the art while still being manageable for even my small hands. The stock is pretty sturdy with a glossy finish and gilded edges. I find myself wishing, however, that there was an image on the back rather than just the black background with a gold border. While this looks fine as a "less is more" contemporary style, I find it picks up finger prints that are noticeable on the glossy finish. I can't say enough good things about this deck.
