Weber

The Protestant Ethic and the Spirit of Capitalism

DOWNLOAD EBOOK
**Synopsis**

Max Weber's best-known and most controversial work, The Protestant Ethic and the Spirit of Capitalism, first published in 1904, remains to this day a powerful and fascinating read. Weber's highly accessible style is just one of many reasons for his continuing popularity. The book contends that the Protestant ethic made possible and encouraged the development of capitalism in the West. Widely considered as the most informed work ever written on the social effects of advanced capitalism, The Protestant Ethic and the Spirit of Capitalism holds its own as one of the most significant books of the twentieth century. The book is one of those rare works of scholarship which no informed citizen can afford to ignore.

**Customer Reviews**

Rather than a general theory or explanation of either economics or religion, Weber attempts to draw a specific link between what he sees as the conjunction of the work ethic of Protestant (mainly Calvinist) spiritual teachings, and the success of Western European Capitalism. Weber is an astute analyst, in many ways. He rightly notes that often the 'sine qua non' of Capitalism is thought of as "greed". Arguing against this notion, Weber points out that all societies have had greedy people within their particular economic system-greed is thus a factor irrespective of economic systems. Replacing this, Weber proposes that the "spirit" of Capitalism be thought of as a particular moral attitude towards work and idleness—an attitude that holds that constant and diligent work for its own sake is a moral imperative. In the face of what Weber calls "the radical elimination of magic from the world" this work ethic was the existential option left for people in terms of atonement and personal
compensation for inadequacies. I believe that these two insights are right on target. If there is a weakness involved in his characterization of this Protestant "Ethic," it lies in the fact that Weber attempts to draw a strict dichotomy in the origins of this ethic. He states forcefully that this ethic does not come out of any Enlightenment thought. The problem with trying to separate this ethic from the Enlightenment, is that this ethic which posits diligent work for its own sake is clearly found in the ethics of Immanuel Kant, who classified this kind of work and labor as a "duty" (ethical rule) that the self has to itself. In other words, how much of this is the legacy of the Reformation and how much of this is the legacy of the Enlightenment?
