This series is a little different. It features a clueless non-prepper who is caught up in some sort of EMP event and his trials and tribulations as he slowly, very slowly acquires the necessary skills to survive. Quite a change of pace from the usual superhero who is a dead shot from the get-go and has an arsenal of weapons, plus food and water, with back up to survive for at least ten years. This

schlub only has a large supply of whiskey, doesn't know how to operate a hand pump, and is a terrible shot. Fortunately for him he has neighbors who help him out because they knew his father and brother. I actually will buy the third book in the series when it comes out.

Another enjoyable Read! I'm looking forward to Book #3!!! The Challenge to survive is difficult enough, then to have outsiders wanting what you have, willing to murder you for it, Yikes!!! For a guy with no skills, he had help to learn what needed to be done & how to survive. Now it's Bob's turn to save the people he has come to Love. Things we take for granted.

What a find! e a lake has instantly become one of my favorites. I put this two novel set among my top ten dystopian fiction works I've read, along with On the Beach, One Second After, The Road, The Book of Eli, A Canticle for Liebowitz to mention a few. Very well done by creating a realistic setting mixed with the inevitable highs and lows of human kind.

After several years, the clueless Bob is still alive and most of his friends. So, far he has not really reached out to neighbors beyond his group or taken time to see what he can use from abandon homes nearby. Maybe he will learn to ban together with some and fight back the few who are trying to take over my killing, imprisonment and slavery.

I enjoyed this book. What would a WbOP? I enjoyed this as much as the first. Gives me a lot to think about. Not sure where the food for the horses comes from during the long winters. Looking forward to #3

I read several reviews that sad the author didn't know how to use the word "seen" and that the dialogue sucked. It was DIALOGUE! It isn't normal in America to have everyone speak the Queen's or that stiff upper lip crap from the romance genre. What is normal s to have back woods folks who DJT give two s***s about what people think of their use of English. I invite readers to step out of their idealistic worldview and accept that ain't everyone got perfect grammar and diction! The realism of the struggles are refreshing. I hope that there doesn't end up being a super well stocked nuke proof bunker with machine guns and hand grenades. I am sick of this genre falling prey to the easy way for the characters. Death, pain, strife, and constant struggle against nature, fellow man, and themselves. That is more realistic. Just like having a fifteen year old get pregnant at the worst possible time, and secretly bent in love with the 27 year old protagonist. S*** happens precisely that

way in chaotic situations.

Wonderful story line. Not your typical setting for these type of books. The characters are somewhat more believable than in most other books, and you rally care about them except when they are acting really stupid or unrealistically. Still, their ability to almost superhumanly accomplish the near impossible while struggling with the mundane gets a bit tiresome. My only real criticism that is always hard to digest is due to the authors ignorance of firearms. This is becoming more the norm in today's America. Example, no one in the backwoods has a decent shotgun or deer rifle. Also, the group is so poorly armed but what happened to the firearms from the bad people they had run-ins with? Also, why in all these types books are the bad guys encountered, so often universally armed with, take your pick, 1911's, glocks, AK47s, M4s, even grenade launchers, where does anyone realistically think these could be found in quantity, meanwhile our heroes can't seem to lay their hands on a couple simple revolvers or a 30-06, or even a 243. Overall fun story though

Fantastic story! Excellent character development, and, unlike so many others of this genre, a believable story line. One of the first stories I've read that aren't set in a warm climate, or have a "retired navy seal, weapons expert, paramedic, prepper extraordinaire" as the main character. I'm looking forward to the next installment.
