Synopsis

Bright and earnest Erena has trained all her life for this. One of only five people chosen to leave Earth behind and embark on the first ever manned mission beyond Earth's solar system, she's the best humanity has to offer. But after only a few months out, Erena's ship is attacked by beings whose purpose she can only guess. She and the other female crew member are dragged away, while the male crewmen are killed before her eyes. Confused and afraid, Erena finds herself being sold in an alien black market as a rare novelty. Sold to a strange but captivatingly handsome alien named Shang, Erena struggles to defend herself, find her crew, and get home. But soon, she finds she must also resist the attraction she feels to her new owner. Though she tells herself it's only sexual, with every day they get closer and Erena's determination to get home begins to waver, especially once she discovers cross species impregnation may not be as impossible as she thought. |Adults Only!

I liked this story ok but there are parts that didn't make sense to me. There were some pretty big inconsistencies. *****contains spoilers*****1) they had to be in a cryogenic state for "several years" according to the beginning of the story but later on getting back to Earth is like a hop, skip, and jump

away.2) her shipmates supposedly locate her through DNA but later the captain says she doesn't know how to use it.3) and this is just a personal peeve...but the cover of the book is in no way reflective of our man character, who is described as having "russet" colored skin and horns. Why is he blue on the cover? Aside from these things the editing is horrible! Wrong words, missing words, etc. Oh well it was interesting enough I suppose. I didn't really like the ending at all!! They are just gonna live on Earth with a supposed disguise. What are the hybrid baby? How will they hide him. Just makes no sense to me. Worth reading but I hated the mistakes.

I was given a free copy of this story for my honest opinion. More often than not, when I read romance, I read it for the male characters. I have every desire to fall in love with them right alongside our heroine. In this story, however, I found myself loving the heroine more than her romance interest/owner. Erena is a science girl, smart, curious, and fascinated with the worlds and peoples that she interacts with. I really liked that about her. Her own interest in understanding sparked mine and I was right there with her the entire time. I loved it, I loved her. Shang is her romantic counterpart and I felt he rode the alpha-male-alien trope just a little too close. He didn't really seem to gentle himself at all towards her, and that made me a little unsympathetic to him. Yes, his character was described well, and he had his own voice, but there was nothing about him that made him stand out in a sea of similar heroes. In the end I read the story for her, and I felt that was worthwhile.

Erena's love of science turns from a dream to a nightmare! Lots of suspense reeled me in right from the very beginning, and you get a nice little background story on how Erena got into her predicament. Great sci-fi details and thrills, and of course everything you'd hope for from a this quick little alien romance.

I'm always surprised and delighted to find a good alien romance. And this one is very good. All its elements work together and bring you a satisfying read. There are so many aspects to a well written book that I won't even try to list them but this book does do them all well so this is one I recommend.

The story was fast paced and was interesting until the end. I don't want to give it away but it seems like the author just decided to end the story but left out the whole point of the story. I was left unfulfilled by the ending.

"The Alien's Pregnant Mate" is Marla Therron's 2nd book from the Celestial Mates series. I'm just mentioning it to make clear that it is a scifi alien abduction romance story, as sometimes people seem to not know that. The story line is about Erena from earth who was with some colleagues on a mission far away in the universe. Her space ship got attacked by aliens and she and her female crew members were transported to a strange and unknown planet where they were sold as foreign pets. Erena's new owner is handsome and she is somewhat attracted to him, but her plan is to find the other crew members and also to find a way to leave the planet and returning to earth. Sexual feelings and other distraction provided by her sexy new owner make things complicated. And then there is this pregnancy thing ... I will not spoil the story. I really like the book and give it a five star rating. But as mentioned in the beginning, it's a good read who are into this genre.

This was more a 3.5. First book I've read by this author and it was pretty good! Good descriptions of space flight and alien beings and worlds. The heroine was no shrinking violet and handled everything that was thrown at her well. Dislikes, we do not get the POV of the hero and with this storyline, which includes fated mates, that would have been beneficial. You really don't see him speak of what she is to him until the last chapter. Up until then, nothing is mentioned so you really get no sense of his feelings which I didn't like personally.

I recently started reading sci-fi content and I am glad that I did. This book is great, I feel in love with the characters especially Erena. Her curiosity is infectious and makes you eager to read more of the book. I would recommend it to everybody who enjoys this genre and for those who want to escape the real world for a day or two.
