## Synopsis

Hardbound. To date, the second edition of the Rodd's series consists of 71 volumes and over 30,000 pages. In the Cumulative Index will be found the entire contents of the 2nd edition and both of the supplements, together with a list of main titles and chapter headings for each volume. This index will enable the reader to make better and easier searches in Rodd, which is the most compact, comprehensive and accessible survey of organic chemistry ever written. Rodd's Chemistry of Carbon Compounds is continuing with a short series of topical volumes on emerging subjects that are not covered in detail in the main volumes. The first two topical volumes will cover organic electrochemistry and asymmetric catalysis.
