Customer Reviews

Most churches maintain some type of media center or church library in which to catalog their materials. Many cannot afford to purchase one of the computerized media classification systems available. "A Classification System for Church Libraries" is compiled for use with church related material. It is a great reference manual for the church librarian. This book is easy to use. It has a great relative index based upon the Dewey Decimal System which makes classification of all types of media simple. Even volunteer media helpers can, with very little training, log in and catalog various types of media using this book as a guide. "A Classification System..." makes a great desk reference. I would be lost without my well used copy. Donate one to your church library.

This book is very helpful in beginning a church library and learning the very basic Dewey Decimal system. It is a reasonable price compared and yet a good resource compared to the very expensive books available.

I actually revamped and re-catalogued a church library using primarily this book. Our library has

approximately 600-700 titles, so it could have been impossible without the little paperback book I grew to rely on. I knew nothing about the process of getting a book into circulation until I found this book, which was recommended by another church librarian.

This is a great book, and is a must for every church with library. It has everything you need to classify and sort your books using the Dewey Decimal System. However, I would suggest purchasing the book from the publisher at Lifeway.com -- it's only \$15.95 and in stock, which is less than half the price of the used books listed here on . I won't even talk about why some are trying to sell a new \$15.95 book for hundreds of dollars. Trust me -- check out Lifeway.com

This particular book was copyrighted 1996 by Convention press, revised edition in 2004 by LifeWay press, and currently in its sixth printing in 2012. To the point & easy to follow as it helps adapt the Dewey Decimal system to even a small library like our church's. The Relative Index in the back of the book is so handy to look up subjects with its classification number written beside the topic. As a newly appointed assistant church librarian, I'm so thankful for a detailed & easy-to-use resource such as this book.
