# Feline Cardiology

## Synopsis

Feline Cardiology is the first book dedicated to the diagnosis and treatment of heart disease in cats. Designed for use in clinical practice, this reference combines cutting-edge information with practical applications, using a consistent format for ease of use. Feline Cardiology provides detailed, species-specific information that is absent from other texts, with an emphasis on the most commonly encountered feline cardiovascular diseases. Drawing on the expertise of four internationally recognized authors, the book is packed with state-of-the-art information within the framework of daily practice. Coverage ranges from basic and advanced treatment approaches for cardiomyopathies, arrhythmias, and many other disorders to the newest information on genetic testing, circulating markers of heart disease, and more. Feline Cardiology provides a comprehensive single resource to managing cardiovascular disease in cats and is a welcome addition to any small animal practice library.
