Comparative Reproductive Biology

Synopsis

When considering the physiological systems of the body, the degree of species variation within the reproductive system compared to other systems is remarkable. Furthermore, it is essential that researchers, educators, and students alike remain aware of the fundamental comparative differences in the reproductive biology of domestic species. Written by renowned scientists in their respective fields, *Comparative Reproductive Biology* is a comprehensive reference on the reproductive systems of domestic species. The book offers both broad and specific knowledge in areas that have advanced the field in recent years, including advances in cell and molecular biology applied to reproduction, transgenic animal production, gender selection, artificial insemination, embryo transfer, cryobiology, animal cloning and many others. This seminal text includes topics in animal reproduction that are usually only found as part of other books in animal science such as anatomy, histology, physiology, radiology, ultrasonography, and others. * Comprehensive reference of the reproductive systems of domestic species * Written by a team of top researchers * Richly illustrated throughout, including 12 pages of color images

Book Information

Hardcover: 432 pages

Publisher: Wiley-Blackwell; 1 edition (August 14, 2007)

Language: English

ISBN-10: 0813815541

ISBN-13: 978-0813815541

Product Dimensions: 8.8 x 1 x 11.3 inches

Shipping Weight: 3.1 pounds

Average Customer Review: 5.0 out of 5 stars [See all reviews](#) (1 customer review)

Best Sellers Rank: #2,431,248 in Books (See Top 100 in Books) #28 in [Books > Medical Books > Veterinary Medicine > Obstetrics](#) #160 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Reproductive Medicine & Technology](#) #195 in [Books > Medical Books > Veterinary Medicine > Anatomy & Physiology](#)

Customer Reviews

A 'must' for any serious college-level vet collection is Heide Schatten and Gheorghe M.

Constantinescu's *COMPARATIVE REPRODUCTIVE BIOLOGY*, also recommended as a basic classroom text for any college-level course on animal reproductive physiology and biology.

Scientists noted in their fields provide discussions of domestic species and provide both specific and

broad knowledge reflecting recent advancements and studies, from cellular and molecular biology to animal cloning. Visual reinforcement pairs with authoritative text to make for a well-rounded presentation key to understanding domestic animal reproductive systems.
