Customer Reviews

Usually when you find a gem of a book like this one, it's valuable for one of two reasons. It either provides you with necessary stats for equipment, NPCs, vehicles, etc., or it provides well written backgrounds and galaxy information to use as a backdrop for your adventures. This is the latter. You will not find the biggest and the best equipment, but reading this book is bound to give gamemasters adventure material and ideas for story hooks. It covers the basics of corporate personalities, Rebels, Imperials, swoop gangs, mercenary groups and more. There isn't much that you can just transplant into a game, and there are no stand alone adventures in the book, but considering that you can often find the book for \$7.00 or less (in used condition), there is no reason why a gamemaster shouldn't own the book.

One of my favorite sourcebooks, I had this before but it was damaged in a flood. The illustrations are fantastic, the characters and backstories are wonderful. I do not roleplay, I buy these just to read. They offer a rich compliment to the Star Wars world/fantasy
