# Photoinitiated Polymerization (ACS Symposium Series)

## Synopsis

Photoinitiated Polymerization is divided into five sections. Free radical photopolymerizations command most of the interest and activity within the field and thus is discussed first. The second section discusses kinetic studies of the mechanism of free radical polymerizations. The third section covers cationic photopolymerizations, which along with free radical polymerizations, are being used in many industrial applications. The fourth section is devoted to recent developments in novel photopolymerization chemistry. This section describes new photobase generators, developments in monomers, oligomers and templated polymerizations of liquid crystal polymers. Finally, the fifth section portrays new and emerging applications for photopolymerizations.

## Book Information

Series: ACS Symposium Series (Book 847)

Hardcover: 584 pages

Publisher: American Chemical Society; 1 edition (March 27, 2003)

Language: English

ISBN-10: 0841238138

ISBN-13: 978-0841238138

Product Dimensions: 9.1 x 1.3 x 5.8 inches

Shipping Weight: 2.2 pounds (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #6,244,003 in Books (See Top 100 in Books) #66 in Books > Science & Math > Chemistry > Photochemistry #3977 in Books > Science & Math > Chemistry > Industrial & Technical #4847 in Books > Science & Math > Chemistry > Organic
