Alex Fletcher still has to rescue his college bound son from Boston as well as his neighbor's daughter. That is no small feat as the entire USA has been blacked out by a massive EMP blast and no modern electronics are working in the country. On top of that the meteor strike on the east coast and the resulting tsunami helped to devastate the area. Chaos is running rampant and local militias are trying to take over various sections of the east coast including parts of Boston. Many of the militias believe that the EMP blast is a result of a government takeover and they are belligerent against any form of government military or law enforcement. All Alex has to do is escape Boston with two teenagers and then travel home back to Maine with the area falling into anarchy.....Alex's actions in this book are about the rescue and the aftermath of escaping Boston with his son and friends. His return to Maine and the defense of his family and friends is an amazing story and only his military training gives them a possible chance at survival. This series is well written and entertaining to read. This series would make a good TV series. This independent author is on a roll and his books are some of the best I have recently read. I picked up this series looking for some good books to read. I found this author's works to be exceptionally good. He has a very good writing style and the storylines are action filled and entertaining. His knowledge of military strategy and weapons helps to make the story engaging and something that I just couldn't set down and stop reading. The book is well written and the editing is very good. His development of characters is thought out and it makes you feel that you know the people and relate to them.

Read the review on our website: [...]Less than two days after the United States of America is shaken to its' very core, courtesy of a cataclysm of unknown origins we witness destruction on an unimaginable scale; quite literally the Event Horizon, "the point of no return." Murder and mayhem run unchecked on the streets as warring factions vie for control of the newly-minted "Divided States of America." In his follow up to last years The Perseid Collapse Steven Konkoly begs the age-old question "Who can you really trust?" as he charts the last gasps of a dying nation, offering only mere glimpses of hope across the bleak, destroyed landscape that was once the Eastern seaboard. Picking up right where The Perseid Collapse cut off, the situation in Boston is poised to implode as Alex Fletcher pursues his desperate escapade through the claustrophobic urban jungle to save his son. We are forced to watch on in horror as he wades knee-deep through the remnants of a once great city right into the heart of the terror that seeks to envelope the country as a whole, the hounds of hell nipping at his heels the entire time. After a series of unfortunate coincidences, with lethal consequences, violence looms on the horizon like an impending Nor'easter on both the

frontlines and the homefront, set to blow away any vestiges of the old world left behind, set to leave nothing but death and destruction in its wake. Steven Konkoly spins a taut web of suspense, fear and holds-barred action as he builds on his image of 2019 America that started with *The Jakarta Pandemic*. His imagination plays into our fears and insecurities as the husk of Boston comes into focus in *Event Horizon*; it is distant, foreign, and violent.
