Manheimer's Cataloging And Classification: A Workbook (Books In Library And Information Science)

Synopsis

This work has been revised and updated to include the Anglo-American Cataloguing Rules (2nd ed), the Dewey Decimal System Classification (21st ed) and the Library of Congress Classification Schedules. The text details the essential elements of the International Standard Bibliographic Description; introduces the associated OCLC/MARC specifications; and more. The CD-ROM gives more than 500 PowerPoint slides and graphics identical to the text, in addition to scans of the title page, and title page verso and other illustrations that support examples from Anglo-American Cataloguing Rules (2nd ed). --This text refers to the Hardcover edition.

ISBN-13: 978-0824784935

Product Dimensions: 0.5 x 7 x 10 inches

Shipping Weight: 1.2 pounds

Average Customer Review: 4.1 out of 5 stars [See all reviews](#) (7 customer reviews)

Best Sellers Rank: #2,137,990 in Books (See Top 100 in Books) #118 in [Books > Politics & Social Sciences > Social Sciences > Library & Information Science > Cataloging](#) #620 in [Books > Computers & Technology > Computer Science > Information Theory](#) #1400 in [Books > Textbooks > Humanities > Library & Information Science](#)

Customer Reviews

I had to use this book for a graduate LIS degree and it was okay. There are lots of examples but few explanations so you have to discern for yourself what the author is trying to convey. If you are not familiar with cataloging this is not helpful since it does not explain very well. I am looking for a book that shows examples and explains the AACR2 rules in English for people who are not familiar with the library terms. This book would have been excellent if there was more detailed explanations.

cataloging is a mind-boggling experience for most people. this book actually helps unravel the mystery of it all! i highly recomend it to anyone trying to decipher the language of cataloging.

This was a required book for a graduate cataloging course. At first I was very overwhelmed by the book but as time went on, I appreciated having it as a resource. The book is heavy on examples but there is not a lot of text that tells you HOW to catalog. However, the AACR2 book, the information from the professor and various online resources like MARC21 and OCLC web sites filled that gap. The various types of examples illustrated are what makes this book a winner.

This book is informative. It gives many examples on how to catalog records with details. It comes with a Power Point disc that goes along with book and that is very helpful. It also has the Cutter Table and explains it. The books gives details about Library of Congress and Dewey cataloging.
