# RDA: Resource Description And Access Print--2014 Revision

## Synopsis

The 2014 RDA Print Revision contains: A full accumulation of RDA the revision contains a full set of all current RDA instructions. It replaces the previous version of RDA Print rather than being an update packet to that version. Numerous changes to the text of RDA have been made since the publication of the 2013 Revision. Cataloging practice described by RDA has not altered dramatically due to these changes, but over 70 percent of the pages in RDA Print was impacted by the changes, making an RDA Print update packet impracticable. The most current RDA the revision contains all changes to RDA up to and including the 2014 RDA Update approved by the JSC. There are two types of changes to RDA that routinely take place Fast Track changes and RDA Updates. The JSC periodically issues Fast Track changes to RDA to fix errors and to clarify meaning. These changes do not typically change cataloging practice as described by RDA. An RDA Update is issued annually. In an Update process the JSC considers proposals to enhance and improve RDA as a cataloging standard. An update can and often does change the cataloging process described in RDA. The 2014 Revision includes all Fast Track changes and RDA Updates since the 2013 publication of RDA and through August 2014. New binding the revision differs from past print versions of RDA in that it is perfect bound volume rather than a loose-leaf packet requiring a binder. Fast Track and Update changes to RDA have proven to be very impactful in recent years, making the loose-leaf packet with update packets impractical. For the immediate future Print RDA will be offered as a perfect bound volume.
