# The Dog Cancer Diet

## Synopsis

If your dog has been diagnosed with cancer, he or she needs to start eating a special diet right away. "The Dog Cancer Diet" (Kindle edition) walks you step-by-step through the homemade recipe and how to make the change from your dog's current diet. You will learn about: \* How to help your dog fight cancer with food \* Commercial Dog Foods & Cancer-Causing Carcinogens \* Water Quality & Cancer \* Why Grains & Sugars are Bad for Dogs with Cancer \* Important Dietary Supplements to Help Dogs with Cancer The right foods--many of which you probably have in your home right now--can be powerful weapons for a dog with cancer. Putting your dog on the diet described in "The Dog Cancer Diet" will accomplish two things: 1) Fight Cancer - while no food is a "miracle cure," there are some that "go after" cancer tumors. 2) Support Immune Response - foods that boost your dog's immune system help your dog's natural defense system. "The Dog Cancer Diet" contains the latest, cutting edge information from one of the leading authorities on dog cancer and full spectrum canine cancer care. Dr. Demian Dressler, DVM (otherwise known as the Dog Cancer Vet) is an internationally recognized expert on canine cancer.

## Customer Reviews

If only I would have learned of Dr. Dressler's Dog Cancer Diet book a few years ago. I have an old yellow lab who is riddled with cancerous tumors and we know he doesn't have long left. Even so, to make his final months happier and healthier I've started him on the Dog Cancer Diet and have put my younger, healthy dog on it to avoid future problems. We don't often think about the foods we give our dogs, but so many of them simply aren't good and may cause various health problems, allergies, and even cancer. By boosting a dog's immune system, and feeding them beneficial foods and supplements it can go a long way in protecting their health and possibly avoiding cancer in the long run. For dogs who already have cancer, this book could add on some happier quality time and have your dog feeling much better. I just started my dog on the krill oil, Apocaps, and healthier foods and he's already doing much better. He's running around and playing where before, I thought he would leave us at any moment!

People have learned that diet plays an integral role in our health. Why have we been so slow to realize the same is true of our 4-legged little ones? Here, Dr. Demian Dressler explores the nature of how food affects dogs and especially how we can administer food wisely when our dogs get cancer. We not only are implementing this diet for one of our troubled guys but we're just going to move to this kind of food in general for all of them, young and old. Grains and sugars are huge problems for the canines. (They are for people many times too; the FDA's Food Pyramid has caused a lot of problems.) Dr. Dressler goes into detail and uses strong evidence to support everything he teaches here. The food we feed our dogs may or may not CAUSE problems such as cancer (sometimes it probably does) but it sure can exacerbate and perhaps bring on the end far earlier than it has to come. You owe it to your dog to learn this and our love for animals was enough for us to write this review to encourage YOU to get The Dog Cancer Diet.

This book breaks down a good diet for dogs with cancer -- in PLAIN ENGLISH. It explains the science behind it concisely and in a way that is easy to retain, follow, and explain to others if they ask why you're cooking for your dog instead of feeding your furry friend commercial food which often but not always contain carcinogens which do not help a dog fight the cancer that is already in their body.

This is an outdated version of The Dog Cancer Diet. Dr. Dressler has made some updates in the 2nd edition of the book "The Dog Cancer Survival Guide", and some of the information in this book is no longer valid. I wish I had known that prior to making the purchase, I would have saved my

money. Thank goodness it was only \$2.99. I recommend purchasing the entire book instead since it's current and has the benefit of more years of research.

Thank you Dr. Dressler for your detailed study about how to extend our dog's life through the food she eats. We had been moving toward an immune-boosting diet for ourselves and your book taught us how to help Sally. She's not out of the woods yet but she is responding nicely and seems to LOVE the food we now give her. One of the primary reasons we got your book was due to the extensive references in back. Our cousin had one and when we saw how well documented your findings were, we knew we were not doing Sally justice if we didn't see what you had to say. We'll keep you posted but she is doing better.

my dog was given 3-4 months to live as he had a melanoma in his mouth. i was desperate to try anything. UK seemed to offer very little info so i went to the American websites. this book had lots of tips on how to prolong my faithful friend's life. it also recommended alternative treatments including a cancer vaccine. i also went for ther radiation treatment. sadly my dog died in June 2013, but we had 6 extra months together that all the vets said would not have happened. he did not suffer at all and died very peacefully. i think the book is fabulous and the help line offered so much support.

The first half of the book explains the importance of healthy nutrition. Well, if I wouldn't have already come to that conclusion I wouldn't have bought the book but this seems to be a problem with all the cook books for pets.... Not impressed by it, was hoping for an easy "how to" manual, it's already disturbing/complicated enough to have a sick dog. I don't like all the recommendations to different links on the internet, do I really want to take time away from spending with my sick dog by reading through all these web sites?!? All the why and how your pet became ill is extremely disturbing since at this point your dog is sick and there is nothing you can do to turn back the clock. **DON'T WASTE YOUR MONEY ON THIS!!**

It is hard to be sure what helps and what doesn't, but my 15 year old dog is still alive 8 months after the first sign of osteosarcoma and 6 months after amputation. She's doing amazing well. I followed this diet for her and did treatments with my holistic veterinarian. No chemo or anything at her age.
