Mayor Jahns and Sheriff's Deputy Marnes have a journey to make. They have to go from the top level of "The Silo" to the bottom to interview a new replacement sheriff. The former sheriff, Holston, had volunteered for the cleaning. He wanted to go outside to clean the lenses of the camera and join his wife who had left 3 years before. He knew it was a one way ticket and that he would either die where his wife did or find her in the new world. Regardless, he could never return to the Silo.The journey for Jahns and Marnes was not going to be an easy one they were getting older and going down the spiral staircase 144 floors would take days down and days back up the dreaded stairs. They had to do it to interview this new candidate for Sheriff. The one they thought might be the best

for the job despite what the dreaded IT manager had said.....I love Sci-Fi and this book is about the end of the world scenario and life in a hidden bunker for hundreds of years. The survivors don't really even know how long their families have lived underground but they do know it is blasphemy to talk of going outside.What makes this story so wonderful is not the Sci-Fi part but the wonderful way the book is written. You will get involved with the characters' lives as well as their emotions and concerns. This book is artfully written and you will become engrossed in reading on just to see what happens next. It is a novel of an isolated society trying to survive for the preservation of the human race. Centuries of life have been spent underground and lost history indicates several uprisings that caused a great turmoil in the Silo. Keeping a tight knit society and working as a team is the key to continued survival.
