## **Customer Reviews**

If you haven't read about the playing cards and their hidden meanings then I highly recommend this book. If you have read some of the other books on the playing cards I would say that this book is required reading. I have studied this system for almost two years before I found this amazing book. The authors have a very straight forward, honest and simultaneously optimistic outlook on the playing cards. The system of the playing cards is one of the most powerful tools that I have found in several years of searching. The reason I didn't give it 5 stars is due to the layout of the book. The content is well worth overlooking the layout. If you want a quick way to discover more about yourself and friends by only knowing their birthday, then this is the book for you.

I previously utilized a couple other books by a different author and they slant toward the negative and it was really nice to have a fresh, brighter interpretation and description of the cards and their influences. I'm doing readings for people and when I reference the books I want to have a more positive approach toward the card meanings so I may share a this perspective and provide hope and guidance toward improving life situations through awareness of influences and ways to affirm joyful, effective growth. It was a pleasure reading this book by these authors and it helped reaffirm my mission.

One of the best books ever written on card reading system. It is simple but indepth knowledge. First book gives the secret behind this ancient system. Anyone what to learn the cartomany secret should read this book. It is highly recommended

This subject is vital for anyone who is into astrology, metaphysics, Tarot cards, or the occult. It will teach you much about your personality, skills, and talents, and those you love and work with. On a personal note, I have used this system to read the destinies of over fifty thousand people at numerous psychic parties and private psychic consultations. It is a crucial element of personality analysis. It and associated works (you might -search "destiny cards" for other excellent books as well) all come from the classic SACRED SYMBOLS OF THE ANCIENTS by Edith Randall and Evelyynn Campbell, which is now out of print but available for like \$100.00 on . These and some

other books which you can track on my purchases, are well worth the price.

Sorry but I did not like this book. I enjoy reading tarot and wanted to learn to read regular playing cards. But with this book, I have to learn astrology and the spreads are extremely complicated and I really don't want to get into all that to read these cards. I will look for a book that doesn't require a year of study to learn how to read these cards.

A good book but a little confusing compared to the books by Robert Lee Camp which I like a lot better.

This was a good book to teach you how to read tarot cards but with playing cards. Very interesting to read and was able to better understand how to use a regular deck of cards to a deck of the tarot cards. I was impressed with the details and knowledge to show you how to read them.

I just started a review & lost it all :( so my 2nd time around is going to be super short. This book describes everything you can possibly imagine & will keep you busy for awhile if you love research, analyzing, & this type of food for your brain!!! The planets, suits, court cards, numbers are all talked about before heading into the cards themselves & life-spread sequence. At the end is another short description of your day along with other signs that share your birthday card too! Part iii is cool too if you want to look up the one card for each year of your life. Each card in the row represents a year of your life starting with the age headlining the row for the age group you're looking up; the 1st letter of your suit is given only & not the whole word, so it looks odd on the pages; at least the symbol would've looked nicer! Have fun & good luck! What's fun for me is seeing whether I know a friend, family member etc has a birthday card in my card sequence that can explain what that influence is like in my life & seeing whether or not that's accurate & how strongly I feel that it is & vice versa. One year someone's bday card was my pluto card & the influence was profoundly & intensely felt, before words were even spoken!!! I guess really guess that our subconscious can react in ways we don't really imagine. I'm glad I got a break since then! :) or that learning experience served its purpose! If I want more information about the cards I go to Robert Lee Camp's book on Cards of Your Destiny & his Love cards book for specific planetary connections with other people, all based on your birthday cards. The chapter on relationship "advice" at the end is pretty good.
