## Customer Reviews

I find this book quite a read. I appreciate that this book has combined the Law of Attraction and the concept of Manifestation. It is profound. And what is even better is that the book has been made for beginners, like me. I have read some books about the Law of Attraction, but never really understood what it is or how it works. This book made things clearer. And another thing worth mentioning is that this book made it clear why some people are still failing in their attempt to use the Law of Attraction and what they might be doing wrong. Indeed, when you put all your best, the universe will conspire to make you achieve what you want. This book is an enlightenment.

This book offered readers the chance to get anything they want or wish for. Provided of course that they do what must be done and make sue of the Law of Attraction in the right way. I find this book an inspiring reading experience. Well, books about the Law of Attraction always are, but this book has given me something more. It has given so much encouragement on how one can try to manifest and use the Law of Attraction. And I think that everything is worth a try. The book even said that this "will FORCE the universe to give you the life of your dreams..." If this is the offer, how can I reject it?

When you want something and you work hard for it, the universe will conspire to make it happen.... Or something like that. That is what I've read before. But then reading this book has given me a different perspective. It made me understand the Law of Attraction more and how one can use it in order to get the things he desires in life. And to quote the author:"The Secrets I'm about to tell you will literally force the universe to give you all the tools that you need to create financial, emotional and spiritual abundance by using the law of attraction."This is exciting. Imagine, forcing the universe in order to succeed in every aspect you want to? This is a profound book that I will be sure to read every now and then.

I am interested in knowing the Secret of Success. This book is talking about that, so I did not think too much ,then I decide to buy it. I am glad I have done that. There are a lot of information I never thought before, and they are all useful and valuable to me. Now, I have practice the strategies in this book everyday and feel more confident than before. I believe I will succeed one day in the future.

I have always been a follower of the Law of Attraction. I believe that it has something to do with what is happening to us, even before. And this book has made me believe in it, now more than ever. I find this book an inspiring read, something that induces encouragement for readers to actually have a try of what it has discussed here. I'm positive that most of us know the powers and perks of the Law of Attraction and this book has more than discussed them. The core secrets principles have indeed motivated me to try and exert more, just so I can experience some of those that one can get once he learned to use these principles. I am rooting for "Get the girl or man you always fantasized about" benefit. This has been an awesome reading moment.

Whenever I have examinations or trials that come along the way, I always tell myself to think positive and that everything will be alright. I still practice this way of thinking which started when I was still in college and up until now. The results are remarkable and are in my favor most of the time. I learned many things from this book most especially the principle behind this law of attraction. I never knew about this law until my sister told me about it. This book has a comprehensive approach in discussing attraction in different aspects of life including health, success, and love and relationship. Highly recommended to incorporate in one's life!

The law of attraction is a very important law of the universe that has been around for centuries and is affecting every moment of our lives. If you fail to learn to use the law of attraction, you will continue to struggle and manifest bad things in your life. If you can learn to take advantage of it, you possess the ability to create and manifest anything you want in your life. Your belief goes up when you see something work, or when you achieve a goal also. That's why it's best to start small. You will get more and more confidence the more you begin manifesting things in your life. Success builds confidence. Great read.

Creating positive life experiences and well being truly begins with believing in yourself. We all have the power within to discover our life goals and purpose, and with consistent affirmations then we can achieve our dreams. This book gave me a good solid reminder that I have the power in my own mind to be anything and everything I want to be in this world. My thoughts dictate my present and future destiny. Easy to read and well written, I recommend studying the fundamentals this gem of a book teaches and applying the lessons. No one can do it for you, success only comes to those who take action.
