The Encyclopaedia Sherlockiana; Or, A Universal Dictionary Of The State Of Knowledge Of Sherlock Holmes And His Biographer, John H. Watson, M.D.

Synopsis

First published as The Encyclopedia Sherlockiana, this A-to-Z reference contains every person, place, & thing associated with the Baker Street duo. "With more than 3,500 main entries, 8,000 story citations, an exhaustive system of cross references, & nearly two hundred illustrations - many old favorites & many published here for the first time - this is an important volume for all who have consulted with the Master as well as for those anticipating the excitement of their first visit to 221B Baker street. Here, literally, is every person, ever place, & every thing that appeared in the chronicles of the famous consulting detective. Each entry conjures up the thrill of discovering the stories for the first time or casts light upon some obscure Victorian phrase or custom for a current reading or rereading. Even the homeliest of objects recalls for us the excitement of the great mind at work."

Book Information

Paperback: 411 pages

Publisher: Avon Books (January 1, 1979)

Language: English

ISBN-10: 038046490X

ISBN-13: 978-0380464906

Product Dimensions: 8.8 x 5.9 x 0.8 inches

Shipping Weight: 1.3 pounds

Customer Reviews

One thing that any fan of Sherlock Holmes knows is that the solution is in the details, and that attention to the details is of vital importance. One thing the Conan Doyle would do in his short stories and novels featuring Holmes would be to overload on details, rather like a magician redirecting attention away; the task for the reader, as indeed it was for Holmes, was to identify which details were meaningful, and which could be safely discarded. Holmes would keep nothing useless in mind, being mindful of clutter - he purported (A Study in Scarlet) not to even be aware that the earth went round the sun, rather than vice versa, as it was not relevant to his work. One assumes that he was pulling the good Dr. Watson's leg, as there are times when such information might be

relevant, and as such, Holmes would know it. There are several versions of the canonical stories available, and various commentaries on these tales published. There is also an ever-growing body of apocryphal tales put out by modern writers. However, there aren't many reference books on Holmes available. Therefore, the 'Encyclopedia Sherlockiana' by Jack Tracy is a welcome volume for any Holmes fan. It is a great companion volume to any serious reader (and many the casual reader) of the canonical tales. Just as any reader of Holmes tales will need to have a care for detail, so too does Tracy have a great eye for the details in the stories. Arranged rather in the fashion of an encyclopedic dictionary more so than as an encyclopedia proper, this one-volume text covers the A-to-Zed of the stories, the people, the places, the objects, the weapons, and other minutiae of the tales. For example, it is well known that Holmes' arch-nemesis, Professor Moriarty, won acclaim by a treatise upon the Binomial Theorem.
