Customer Reviews

This highly readable book is useful both for the general reader who wants to know what globalization is about and for the professor who wants a book that students will understand and enjoy. I teach a course on globalization and searched long and hard for the right book to accompany the course. I have been totally satisfied with this one. The articles are clear, informative, and balanced. There is a variety of viewpoints, ranging from the pro-globalization Thomas Friedman to critics, such as Jeremy Brecher. The breadth of topics is excellent. A few examples include agricultural issues, environment, immigration, cybercrime, terrorism, slavery, gender, racism, and global movements.

This book was purchased as a textbook on a class on Globalization. Though I haven't finished the book yet I must say so far it hasn't been as bad as other textbooks I've had on similar subject matters. Its broken down into chapters and each chapter has a few articles on different aspects of globalization. The different ranging topics keep the reader interested and at the same time a lot of the language used by these different authors is readable not like other textbooks that are often very

dry and academic.

The book gives an interesting set of articles that give you a general idea of different thinkers regarding globalization and its different perspectives.

This was a great deal all around - the price was good, the book arrived within a few days, and it was in the same condition as advertised.

I needed this for a class and it came in a timely manner. It's used but looks great and was a great renting price for a student!

I bought this book for a class. The content is ok, but the book I received was in horrible shape; a lot of water damage.

Useful short readings for students on key issues re globalization. Well organized by chapter topics. SUGGESTIONS Continue to update regularly, but keep first overview chapter Include more on relationship of globalization to global warming or climate change & what is being done about it . More emphasis on "solutions" - what are some countries or world agencies doing right to address the problems ?

Bought for school, it was what was needed.
