The Tricknology Of The Enemy
Today, we here in America numbering twenty or more million people, [are into] one hundred years of begging for freedom, justice and equality. Today, God Almighty of Heaven and Earth, having the power of them both rolled up into his right hand, is here and has chosen us the so called American Negro to put us into Heaven while we live, and not after death. He says there is no Hereafter [for] a physical death. That is the law of the Earth and the Maker and of God that we live; we decay and we die, or accidental death comes upon us as we call it. Nevertheless, we all are here to die as well as to be born. Only way to prevent death it is not be born; so, we feel that we’re justified in appealing to Heaven and every avenue of civilized mankind to give us freedom, justice and equality. We’re daily going about seeking justice for us: our poor people and they find none. It is the same old hard way to go in the midst of our enemies, who outnumber us in population; therefore, they know these things too. Justice, as Isaiah says, stands a far off, and never comes near us. But all over America today, the Black man is shaking himself, and moving himself towards the front that he may enjoy freedom, justice and equality along with the other nations of the Earth. It is always asked by the disbelievers, “What do the Muslim want? What [are] they after? What do they want from us?” We want freedom from you. We want a full and complete freedom from you. We are not seeking your own, we’re seeking our own. Second, we want justice, equal justice under the law. We want justice applied equally to all regardless of creed or nationality or class. Here today, [we have] many of you are getting excited over the struggle that the poor so-called Negroes are making for freedom justice, and equality, though many of us have not the full knowledge as yet how to go about getting that freedom justice and equality that we so much desire and is so much [in] need of. [Although] we make mistakes and errors in going about it in the right way; nevertheless, we are after freedom justice and equality all over the whole Earth. Not [for example just] in America alone, the black man wherever he has been exploited by the white man, on his country today, desires freedom from the power of the western world, the white man. He desires that the white man leave his country and go back home to his own country, but he never goes. He wants to deprive the people of their national resources. He wants everything for nothing then he sells it at a very high price when he gets it, but what do the Muslims want?
Having read various books by Elijah Muhammad, I found the previous reviewer's comment disturbing enough to buy this book. Since Elijah Muhammad's writings are far from shallow and deceptive, I tried to see if in fact the title was worth buying. First of all, I didn't expect a tremendous amount of information from a book so small, but after reading it, I could understand that if one were expecting a total scientific breakdown of what 'Tricknology' is, then I could understand the disappointment; however, the title states, 'Tricknology of The Enemy' and within the book it points out how the White man uses tricks to deceive the Black man and rob him of human rights. These tricks take the form of false promises, under which he rules the Black man. These false promises are expressed in every aspect of life which the white man controls of the Black man of America. Lastly, within the religion of Christianity, which is the sole source of tricks; because through it, the Black man and woman are thoroughly cut off from any salvation coming to him and this in turn makes him and his future generations willing slaves in the name of God. This helps us to understand why iron shackles are no longer needed. He is a mental slave to believing he can't see his God and the closest thing to God is a man that looks like his slave master. This tricknology has been perpetuated through black peoples all over the planet. I think the book made the point.

This is not a book written by The Honorable Elijah Muhammed, it is a reprint of a speech given by
him and added to by the "editor" who calls himself modernizing it by adding his viewpoints at the end. Not worth the money. This was just a handout.

Excellent read easy to understand context.

Not what I expected. Kind of strange

We must learn thing have not change for black Americans 2015 look like 1920 nothing change black Americans ,black Americans need to have a mind change
