Customer Reviews

So when I first heard that Loren "martial arts author" Christensen was putting out a book about ghosts and UFOs and whatnot, it was a definite, "wait... what?" moment. What I've always enjoyed about Christensen's books are his ability to take very complex concepts (such as martial arts,

meditation, nutrition) and filter them into a simple and understandable concept. No fluff and, more importantly, no mysticism. So this one kind of came out of blue. All that said, if you are a fan of Christensen's other books, trust me and check this one out. Christensen takes his vast law enforcement experience, gathers a team of folks with similar experience, and presents a collection of stories that will both interest you and possibly even creep the daylights out of you. This is a side of the law enforcement world you have never seen, heard of, and most likely have never even considered. Even if you, like me, are a skeptic of ghosts and aliens and everything related, give this a try. At worst you will be very entertained. And, who knows, maybe it will make you wonder if there really is something lurking in the dark...

Best book I've read on the subject. Fascinating and sometimes chilling, there is enough variety here to hook people of every interest. I really liked the UFO story and the stories about people vanishing in front of the officers.

Anyone who has stared into the night knows that it stares back. Anyone who has spend time dealing edges of humanity knows there are things beyond the edge. And like so many other things from life out in the extremes, you can't talk about it with 'normal people.' People who live deep in the safety of secular and modern life seldom have these kinds of experiences.

Having worked with law enforcement for 19 years, I really enjoyed the stories. Some of our officers saw and heard some strange things while on the road. Additionally, the old Police Department was haunted. I was in the dispatch office late one night with one of the other girls. We heard the back door open and the distinct sound of footsteps and creaking leather gear that the officers wore. We expected one of the guys was trying to scare us, but nothing happened. It was a small building and I went back to see who had come in but there was no one there. That was the only experience I had, but the dispatchers often spoke about our phantom.

It shipped as expected. The stories are short, and would serve to create interest in someone who has not had any reading experience in this field. The stories are not exciting but promote thoughtful consideration. Each story leaves the reader with a question in his/her mind as to whether this was real or illusion.

Well written. I didn't think this would be readable at first when I realized it was being told in first

person format and from police/military accounts. I found it unbelievable that any law enforcement person would publish anything true. or . all these stories would be allowed to be printed by the powers that be in the current state of political (keep the rabble in the dark secrecy is #1 priority) environment we live in today. Refreshing, to think there are still some honest, or very convincing make believe authorities. No insult meant towards the author. It is a good compilation, written so it held my interest and gives a few goosebumps too! I love the UFO accounts, especially the ones from the Keys base. The subject of the animal mutilation has been going on for many decades, way, way, back, as long as I can remember, is a true unexplained mystery. No definite answer from anyone there. Another big cover up in my conspiracy theory. Overall, and including the religious inclusions stories it is very entertaining and I would recommend this book, it is a Good Read. Thank you for your bravery and sharing Mr. Christensen.

As an open-minded skeptic/analyst/sensitive, I really enjoyed this book. It was credible, adequately written and edited, and some of the incidents related were almost identical to some of my own paranormal experiences. It was a fun and strangely comforting read. It doesn't offer excuses or dismiss these personal stories; rather, it respects the officers' courage to share them and honors the officers' truth. As a window into real life paranormal events, I can easily recommend this book.

Great compilation of stories with great intros from Loren. I especially liked the personal stories added by the author. If you are into law enforcement, ghosts, UFOs, this is a great book.
