Dead And Gone: A Sookie Stackhouse Novel

Synopsis

Except for Sookie Stackhouse, folks in Bon Temps, Louisiana, knew little about vamps-and nothing about weres. Until now. The weres and shifters have finally revealed their existence to the ordinary world. And the backlash may have claimed the life of someone Sookie knew well. But her determination to find out who was responsible for the murder is put aside in the face of a far greater danger. A race of unhuman beings-older, more powerful, and more secretive than vampires or werewolves-is preparing for war. And Sookie will find herself an all- too human pawn in their battle...

Vampires

Customer Reviews

I wanted to give the book atleast three stars bc i love the series so much, but I have to agree with the majority of the negative reviews on this one and say,"what happened?". The last book, from dead to worse, was so detailed and long, it was wonderful! I felt like I was reading a short hand version, or an extremely edited down piece that had to fit into a certain number of words. If CH had kept the same story line for this book and just given us the plot detail and character depth evidenced in the last book, this book would have been simply phenomenal! As a fan, I find that not only

disappointing, but extremely frustrating. ARGH! ***BEWARE*** THERE BE SPOILERS
HERE ***** OK, so the two stars were basically for giving us at least SOME
progression with the whole Eric/Sookie relationship, although it still basically went NOWHERE. So
he tricks her into what is basically a vampire form of marriage and she barely reacts - she had more
of a hissy fit when he yelled at her for dancing with Barry Bellhop in Rhodes! She blames her lack of
anger on her blood bond, but she also states that she hasn't seen him for months and that should
lessen a little over time...it just seemed weird. And as neat as that story line is, it wasn't even
addressed or reacted to by anyone (except Sam, but barely). I mean, come on! I don't know why it
matters though, bc I figure in the next book she will find something to be mad at him for and he will
be on the outs like Bill, Quinn, and everyone else she gets involved with - I just feel like the whole
Eric thing has been building up over so many books that there should be more time devoted to
finally developing that before it gets ruined for further plot development - we've been "teased"
enough.

I really, really fell in love with this series, and I had read each of the preceding books four or five
times in the past 10 months. There were great books and some just "good" books, but I have to say,
in my opinion, the quality of the writing and the plot and story of "Dead and Gone" fell way below
that of the previous books in the Sookie series. To be specific, like many of the other reviewers I do
think the appearance and disappearance of characters was rushed, and Harris didn't adequately
give Sookie time to make emotional sense of the many different events. It felt as if Harris was
writing in shorthand - and while that may be okay for the introductory descriptions of characters and
places at the beginning of each book, it does the reader a disservice for the substantive action.
(SPOILER) Just one example was the moving out of Octavia - it was so stunted and never referred
to again, an obvious device to get the room across from Sookie's empty again so Sookie could have
more "intimate moments" shall we say...I also thought Harris fell completely short in expanding the
mythology of the series. In each of the previous novels we've found out something new about the
structure of the supernatural world. There was nothing new in this book, and worse, Harris
neglected the dangling issues from previous books entirely: e.g.

I re-edited my original review for this book. Initially I gave this book a 2-star rating, but I've just
finished a re-read of it today, 4/30/10, and I really had to change my rating to 1-star. I really hate this
book; I've kept some of my original review and added new parts. Spoilers may be present: The book
starts with the weres and shifters revealing themselves publicly, but then this revelation is mostly

dropped. It's a prop to temporarily remove Sam, set up the first murder, and throw a red herring in later in the book. The murder victim dies in a truly grotesque manner; this person is also related to someone who the police chronically suspect of other crimes throughout the series. Been there. Done that. The Were theme is basically dropped, and it's on to the fairy war. The fairies are divided between those who like contact with humans and those who want to close off the fairy world. In addition, the separatists want to eliminate anyone who is not purely fae. Of course, this means trouble for Sookie. It's really difficult to care about this war. In DTTW, it was easy to emotionally vest in the witch war; you were on the side of the vampires/shifters since you had gotten to know them over several books. You also got to see the bad witches in a couple of scenes before the actual war so you knew who you were rooting against. Niall and the fairy world haven't been developed enough. Enemy faeries are named and briefly appear, but who cares, there is no sense of identity. Even the "good" ones we know: Niall, Claudine, and Claude are wooden props. It's as if the author says "cue faerie" and *poof* Niall appears to explain another part of their boring war. Even a reveal about Sookie's parent's death feels forced.
