This author sure has a fantastic imagination. Today people, futuristic people, witches, mythological creatures - all mixed up together. It is sometimes hard to figure out what is what and who is who. I definitely get confused but will more than likely read follow up books.

Jesse Delacriox is blessed or cursed with the fact that she can see her granny and her mother and they are ghosts. They help her run her B&B and also help her solve mysteries in the small town they live in.

I absolutely love this series; the main character is fascinating and the more we learn about her backstory, the more interesting the books become. The only downside is waiting for the next book in the series!!

Semi spoiler alert. I love imagination in a writer. I do. And I confess that I'm not too crazy about stories that reduce magic to aliens and advanced physics. Nevertheless, though this story is pretty

well written, there are just too many elements that defy credulity. I can only suspend just so much disbelief, and some of the elements are discordant--the gods are really aliens, but there are ghosts and demons, and a battle between good and evil. And everyone around the heroine is either as wildly talented as she is or they accept all the craziness as normal. And it is mostly used to solve a perfectly ordinary mystery with again, you guessed it, some elements that just don't quite come together when they are trotted out at the end to explain the murderer's behavior. The finale seems a bit rushed and it all gets explained instead of naturally revealed. This book probably just needs a good editor to tone it down and smooth it out, and it is better than the first two books in the series. I probably will read the next one because parts of the premise are interesting, and because the author is promising and may eventually straighten all this out on her own. Surely someone this talented will eventually see the problems with her work and rein herself in.

Can't wait for the next installment. Always a mystery to solve along with more revelations about Jesse and her unique family and her being a guardian foe earth. 2 ghosts , Jesse Mom and grandmother, a unique character that turns into 4 people and now additional of an unknown father to come.

How would you feel if you did not know about your family history. Jessie has wanted to know her whole life.... and in this book of the series, she is going to learn who her father is..... and Wow will you be surprised..... I sure did not have that one figured out.. And there is a day long festival going on, and there will be a Prince and Princess crowned and a ball and music, and. Carlos the chief at the Inn has food groups that are going to judge his food, not Granny's ... oh, heck, that does not all happen, someone gets killed, and the hunt is on for Jessie and her group of friends, along with her faithful companion Arthur her beagle.. And then there is Travis, will a romance ever begin with him and Jessie. Cammy Jo pops in for a visit, well it could be she wanted to see Zack... and Jessie of course. And Jessie is still waiting to here about her family history..... Got to read this one to find the answers. You will be surprised as I was I am sure, and will enjoy this one as much as I did!

It's a little to far out for my taste but I'm sure there are others that are into that type of spiritual entities. Ghosts I can accept but I evils sprits flying around tapping people with curses are a litrle out of my element . The author has written some good books though.

This one of my favorite book series! Very well written, with complex characters and many

twists,turns and suspects! There's also some fun, romance and let's not forget a about the ghosts, shape differs and evil spirits! I can't wait to read book 4!!!!
