A.D. After Disclosure: When The Government Finally Reveals The Truth About Alien Contact

Synopsis

"A.D. by Richard Dolan and Bryce Zabel is an important attempt to prepare us for what will one day be inevitable: an open understanding that we are not alone. Not in this universe, and not even on Planet Earth."--Edgar Mitchell, Sc.D, Apollo 14 Astronaut"I've imagined this future many times, but these guys actually wrote the book on it! Zabel and Dolan have brilliantly created a compelling blend of history and informed speculation that makes their exciting world seem like tomorrow's news today. Don't dare miss it! 'Nuff said."--Stan Lee, creator of Spiderman, X-Men, Avengers"What if the UFO cover-up is real and what if it ended? After Disclosure poses this fascinating question and looks at the societal consequences of such a revelation. Richard Dolan and Bryce Zabel have produced a thoughtful and provocative analysis that goes well beyond the usual scope of books on UFOs and alien life."--Nick Pope, former chief of UK Ministry of Defence UFO Desk"You may not have ever considered what life will be like after the reality of UFOs becomes publicly known. But Richard M. Dolan and Bryce Zabel have. Their book is absorbing and thought provoking. Don't miss it."--Jim Marrs,Â New York TimesÂ best-selling author ofÂ Crossfire"Considering the overwhelming evidence that Earth is being visited by alien spacecraft and that many intelligence agencies and military groups have known this to be true for some time, we certainly need to consider the serious question of what happens when Disclosure actually occurs. This book by Zabel and Dolan is the first in-depth attempt to answer that question. It is long overdue and sets a high standard of discussion about this very complex issue. Well worth reading."--Stanton T. Friedman, MSc., nuclear physicist, author ofÂ Top Secret/Majic, Science Was Wrong"As a physician, researcher, and creative writer, I stand on the shoulders of others to see and climb the next mountain. A.D. After Disclosure is a brilliant, enjoyable primer that holds a feast of ideas that will make any audience think and wonder. This work offers a place to stand where others may take up the challenge and travel to places none of us could conceive. Richard and Bryce have performed a great service both to our culture and that of the 'Others.'"--Dr. Jeffrey Galpin, infectious disease specialist, molecular biologist, AIDS researcher"Disclosure, the formal acknowledgment by the world's governments of an extraterrestrial presence engaging the human race, is inevitable. So was this how-to book on what to do when a new world begins."--Stephen Bassett, executive director, Paradigm Research Group"What if UFO secrecy ended tomorrow? The transition from B.C. (Before Confirmation) to A.D. (After Disclosure) is the ultimate "what if?" scenario in which the calendar is reset and history begins again.This work of speculative non-fiction combines meticulous fact-finding from historian/researcher Richard M. Dolan and forward-leaning scenarios from journalist/screenwriter Bryce Zabel on the world's most mind-bending subject. The authors predict radical changes after

official acknowledgment that at least some UFOs are intelligently controlled craft from somewhere other than Earth. A.D. After Disclosure isn't afraid to make mind-blowing, specific predictions, such as: Congress will hold Watergate-style hearings and ask secret-keepers, "What did you know and when did you know it?" The first decade A.D. (After Disclosure) will be like a high-tech 1960s, spawning massive cultural and societal change. Abductees will file a class-action suit against the government for withholding critical information. All the textbooks on planet Earth--from history to science--will need an immediate review. Whether disclosure leads to social panic or ushers in a new era of unity and peace, it will undoubtedly be a game-changing event.

Book Information

Paperback: 320 pages

Publisher: New Page Books; 1 edition (May 22, 2012)

Language: English

ISBN-10: 1601632223

ISBN-13: 978-1601632227

Product Dimensions: 5.9 x 0.9 x 8.9 inches

Shipping Weight: 1.2 pounds (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars [See all reviews](#) (108 customer reviews)

Customer Reviews

An interesting speculation on the question of what will happen to our civilization after 'Disclosure' happens - that is - after it is openly acknowledged by our civil authorities, our governments, our media and military leaders that there is an ongoing presence on this planet comprising extraterrestrial beings of unknown origin. To wit, what will happen after the President of the United States announces to the world (probably on a Friday evening just after the Markets have closed) that some UFOs are alien spacecraft and that the US Government has been hiding the truth for (to date) nearly 7 decades. The book is well thought out, well researched and is in my view a noble attempt to predict the unpredictable - an event which will be the greatest 'Black Swan' in the (known) history of the world. Richard Dolan, a historian who studied at Oxford and who was a finalist for a Rhodes scholarship, is well known to those interested in the UFO phenomenon. His two groundbreaking volumes 'UFOs and the National Security State' have exhaustively chronicled the

undeniable reality of the UFO phenomenon and the 'Cosmic Watergate' cover-up that has remained in place since 1947. Bryce Zabel is a former investigative journalist and Hollywood writer and producer who, amongst other shows, wrote and produced the NBC miniseries 'Dark Skies' - a fictionalized (and highly entertaining) account of the events that transpired in the years following the Roswell crash. If you are looking for the one book to read which chronicles and summarizes the overwhelming evidence demonstrating the reality of some UFOs as ASCs (alien spacecraft) - this is not it. That book might be either one of Mr.

Well, it's been a long 50 years since the Air Force's disappointing response to UFOs in project Blue Book was published. And ten authors have shown that the Giza pyramids and the Sphinx are over 12,000 years old and built by extra-terrestrials. Half the population believes that UFOs are manned by alien beings. And finally, the Drake equation concerning the probability that there are 100 million intelligent civilizations in this galaxy is taking real meaning for humans. Why aren't they here? Because we have been ignoring all the massive amounts of evidence that they are. Uh oh, what does that mean for the future. But, we have a real problem switching technologies from burning crude oil products and using only Tesla's early electric field generators to using zero point energy generators and propelling our vehicles with gravity drive engines. History shows us that rapid change has doomed most empires. The Chinese turned away from the challenge of foreign trade and were caught unaware by the British and subjugated for a hundred years. England was successfully raided by Vikings in the 800s and York became a Viking town. India was invaded and ruled for over 200 years by the British invaders until a political genius figured how to recover from that disruption of culture and nationality. So, here we are, slowly getting poisoned by the use of numerous oil products and wondering when it's going to run out enough so we are forced to stop. We need someone to suggest how to provide a soft landing from the mess that we have created and limit the expected disruption around the world when ET's are acknowledged by our governments. Well, this book provides such a scenario.
