Customer Reviews

I used this textbook to teach a homeschooler chemistry and I was really impressed. It's clear

concise, contains a great deal of material and is not very math heavy. In other words just the thing for someone whose highest level on math is Algebra.

I ordered the book on dec 16 and it didnt come until this past weekend. i ordered two study guides and those came by the first week in jan but i ordered those in late dec. I called b.c i needed the text book for school and they gave me the run around. i was told the book was sent out in dec 20's but i called back and got a different consultant and they told me the book hadnt even been sent out. UGH. So stressful I'll order again but next time Im just going to order it WAY EARLY. but other than that. the book was great it was used but nothing was written in it and it was in very good shape.

I appreciated the Thank You letter for my purchase and the book was in very good shape. I am glad because I tend to rough up my books alot from using them so much :D. The shipment came as I expected!

The book was in good shape and came within two weeks of ordering it. I saved a lot of money by getting this book. I'm glad I bought it!

Love the book rental program
