## Customer Reviews

This book has too much information about aliens and other stuff of area 51. If you really are interested in this subject then this is your book. All the interesting and fascinating information about UFO's and aliens is explained here. All the conspiracy theories, all the alien races information are given here. So, I think you should buy this book if you are as thirsty as me.

It was a great time while reading these vast information about aliens and area 51. It's a great stuff for you if you are interested in aliens. Aliens and UFOs are some people's main attraction so this book will be an awesome book for all of them. Information about alien encounters, abductions, and UFO Sightings are perfectly described here. I was so much fascinated while I was reading this book. I highly recommend this book to you.

We are not alone in this universe. There are other creatures who live among us. We call them aliens and to know about them we have been trying in many ways. This book has those information about alien and UFO encounters, alien civilizations etc. which will blow your mind. I don't know these information are right or wrong. But what I do know is I enjoyed reading this book very much. So don't waste your time and grab a copy.

UFOs and aliens are always in my dreams since i was a kid and I had been collecting books to know their existence and on how they move around the universe. I am always fascinated with the thought of aliens and UFO's, I always have this doubt if they are true. This book has help me understand the doubt I have. This book covers the history and mythology of one of the best known and most mysterious government research facilities area 51 is most famous for housing the alleged extraterrestrial spacecraft and alien bodies. This is a great book if you are in the mood for some extraterrestrial conspiracy history.

This book consists of an informative description on UFOs and Aliens secrets that helps me to know about the portrayal o f Aliens in pop culture, the ancient spiritual connections between religion and aliens and unanswered questions about alien hieroglyphics on Mars. I was little concerned about the Roswell UFO incident, and its beginning but this book discovered the area 51 and ufologists to give me a clear concept on the cause of its fascinating. It also presents crop circles and other unexplained phenomena as an evidence of visitors from another world. I enjoyed this book very much.

This book gave me a lot of what I already knew and some things I didn't. The book presents the evidence from conspiracy theories to questioning facts then at the end of each chapter it makes you think about what has been presented. Everything was presented from the history of ancient aliens to modern day abductions, I like how this book is not just one sided and gives an argument for both sides

As a child I had a t-shirt of a hitch-hiking alien saying 'take me home'. Aliens have been in our consciousness for many years now. Some believe in them, some don't. A trip to the museum a few weeks ago, and I went to the 'planets' section where I saw that the edge of our known solar system is ten million million kilometers from our Earth. That area was scaled down and compared to the rest of the universe, and it was smaller than a match box. Perhaps it's arrogant to think we are the only ones. I'm not a skeptic, I am open-minded. Humans tend to want to own everything and I understand this. I believe I've been met by an alien before, but gosh... I wouldn't want anyone thinking I'm crazy. I believe Alex, the author, may well be channeling this information; perhaps without knowing he could be in contact with a light-bearing race of beings known as the pleadians (I don't see mention of the pleadians in the book, but they sure would have been responsible for the

bonus content/books at the end). The book begins very conversational, which is great. Alex is trying to get you to open your mind to all this, and personally I support it. A simple question to ask is, if you as a human were in control of the Earth, how would you change the destruction that has befallen us? Do you believe we created this destruction, or could it be that we were driven in this direction as an experiment? If we're an experiment, who's experimenting on us? I appreciate the content at the end on Crystal, Reiki and Chakra healing. I've basically received about four books just by purchasing this one. Even if you don't believe it all now, give it a chance... it may start to make sense to you.

This book ensures you understand all of this essential knowledge about them. In UFOs and Aliens, you'll find out about alien encounters, abductions, and UFO Sightings. It has lots of great information and even evidence to support the facts. This book covers the history and mythology of one of the best known and most mysterious government research facilities area 51 is most famous for housing the alleged extraterrestrial spacecraft and alien bodies. This topic is one of my favorite and I never miss any video or any article.
