Hetero Diels-Alder Methodology In Organic Synthesis (Organic Chemistry)
Synopsis

Organic Chemistry: A Series of Monographs, Volume 47: Hetero Diels-Alder Methodology in Organic Synthesis focuses on the use of hetero Diels-Alder reactions as pivotal steps in natural product total syntheses. The publication first offers information on N-sulfinyl compounds and sulfur diimides and imino dienophiles. Discussions focus on sulfur dioxide and related compounds, selenium dioxide, sulfur diimide cycloadditions, regiochemical, stereochemical, and mechanistic aspects, iminium salts and neutral imines, oximino compounds, and intramolecular cycloadditions. The text then takes a look at nitroso and thionitroso dienophiles and carbonyl dienophiles. The manuscript elaborates on thiocarbonyl and selenocarbonyl dienophiles and miscellaneous dienophiles. Topics include nitriles, azo compounds, selenoaldehydes, thiketones, thioesters, dithioesters, and related compounds, and thiophosgene and related compounds. The text also ponders on oxabutadienes, thiabutadienes, and azabutadienes. The publication is a valuable reference for chemists and readers interested in the Hetero Diels-Alder methodology.

Book Information

Series: Organic Chemistry (Book 47)
Hardcover: 366 pages
Publisher: Academic Press; 1 edition (November 11, 1987)
Language: English
ISBN-10: 0121108600
Product Dimensions: 6 x 0.9 x 9 inches
Shipping Weight: 1.6 pounds (View shipping rates and policies)
Average Customer Review: Be the first to review this item
Best Sellers Rank: #4,104,672 in Books (See Top 100 in Books) #95 in Books > Science & Math > Chemistry > Organic > Synthesis #3372 in Books > Medical Books > Medicine > Internal Medicine > Pathology > Clinical Chemistry #10390 in Books > Textbooks > Science & Mathematics > Chemistry
