Customer Reviews

First, let me say that I bought this for the Trek content and for inspiration as a writer and may never play the game. I have played some previous RPGs (none Trek) so I can still evaluate it as one - I hope. Anyway, this appears to be a complete player's guide. Unlike some games, everything you need is here, and sourcebooks are extras not essentials. There are ten starting species to play: Humans, Bajorans, Betazoids, Cardassians, Klingons, Ferengi, Trill, Vulcans, Talaxians and Ocampan. Each matches what we have seen in the show in their attribute modifiers and special abilities, although Vulcans have so many that some were cut. The action is done by rolling dice

once, adding your character's skill score, bonuses and penalties and then comparing the result to the number needed for success. Everything your characters can do is expressed in a skill, and the range of skill coverage is very good. Characters also have edges and flaws, character traits that help define their personalities and affect their skills. Finally, each character also has Courage points. These represent heroic action and you use them to add to your rolls, either to prevent failure or boost the level of your success. (I would love this feature as a player.) There are seven basic professions: Diplomat, Merchant, Mystic, Rogue, Scientist, Soldier and Starship Officer. There are elite starship officer professions for every one we have seen in the shows. There are other elite professions that can be entered by anyone meeting their prerequisites. This system manages transfers like Spock from Science Officer to Commander to Ambassador and then probably either Envoy or Spy, all as a Starship Officer. All in all, the system really captures the feel of Star Trek characters. The guide has a number of flaws.
