# F. G. A. Stone: Leaving No Stone Unturned: Pathways In Organometallic Chemistry (Profiles, Pathways, And Dreams)

## Synopsis

Gordon Stone, famous English professor, bridged inorganic and organic chemistry. He and his colleagues synthesized hundreds of novel organometallic molecules having remarkable and previously unknown bonding characteristics, leading to an understanding of the structure and reactivity of many unusual and curious organometallic substances. In this book, Stone discusses the nature of funding and academics in Britain and in the United States. Much of Stone's dry wit and insightful wisdom is illustrated in his autobiography. In addition, many photographs depict both the professional as well as the personal side of this renowned scientist.

## Book Information

Series: Profiles, Pathways, and Dreams

Hardcover: 200 pages

Publisher: American Chemical Society (May 5, 1993)

Language: English

ISBN-10: 0841218269

ISBN-13: 978-0841218260

Product Dimensions: 6 x 0.9 x 8.9 inches

Shipping Weight: 1 pounds

Average Customer Review: Be the first to review this item

Best Sellers Rank: #2,949,083 in Books (See Top 100 in Books) #62 in Books > Science & Math > Chemistry > Organic > Organometallic Compounds #576 in Books > Science & Math > Chemistry > Inorganic #1778 in Books > Medical Books > Administration & Medicine Economics > Public Health > Epidemiology
