# Solar Revolution: Why Mankind Is On The Cusp Of An Evolutionary Leap

## Synopsis

Does the sun have the power to transform humankind? In *Solar Revolution*, German biophysicist Dieter Broers makes a compelling case, pointing to a wealth of scientific evidence that shows a remarkable correlation between increases in solar activity and advances in our creative, mental, and spiritual abilities. We are in the midst of a dramatic rise in solar disturbances, which have the ability to affect Earth in alarming ways, disrupting the geomagnetic field, knocking out entire power grids, and influencing the development of organisms and the ecology as a whole. Remarkably, solar activity is predicted to peak toward the end of 2012—the same time the Mayans predicted the end of days. But Broers—who has for decades been studying the effect of electromagnetic fields on biological systems—sees the coming shift not as an apocalypse, but as the dawn of a new age. Drawing on research from a variety of scientific disciplines, Broers shows how this eruption of solar activity is a positive thing for humanity, that it is boosting our brain capacity and expanding our minds in ways we never imagined possible. Abilities now seen as extraordinary or supernatural—such as telepathy, extrasensory perception, and off-the-charts intelligence quotients—will become ordinary and natural ... and may very well help us solve the mounting global crises we're now facing. Without a doubt, the way we think, feel, relate, communicate, and experience reality has been changing dramatically in recent years, and Broers affirms those changes will ultimately culminate in a new form of consciousness and harmony on Earth. Humankind is going through an evolutionary leap, says Broers, and the process has already begun.

## Book Information

Paperback: 248 pages

Publisher: EVOLVER EDITIONS (September 4, 2012)

Language: English

ISBN-10: 1583945040

ISBN-13: 978-1583945049

Product Dimensions: 6 x 0.7 x 9 inches

Shipping Weight: 13.4 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars [See all reviews](#) (6 customer reviews)

Best Sellers Rank: #1,422,556 in Books (See Top 100 in Books) #547 in [Books > Religion & Spirituality > New Age & Spirituality > Divination > Prophecy](#) #959 in [Books > Science & Math > Physics > Electromagnetism](#) #2350 in [Books > Medical Books > Basic Sciences > Physiology](#)

## Customer Reviews

"This is the kind of revealing knowledge that only an 'integrator scientist' could organize ... a profoundly important document."â " Dr. Michael A. Persinger, Full Professor, Behavioural Neuroscience and Biomolecular Sciences Program, Laurentian University, Sudbury, Ontario, Canada"Broers is a visionary scientist with the courage and commitment to elaborate on some of the most difficult and critical aspects of society as a whole."Nassim Hamein, The Resonance Project Foundation"As we face the great challenges of the twenty-first century, this exciting book provides a positive perspective on how we, as proactive stakeholders, are part of a true planetary transformation."J. J. Hurtak, PhD, author of The Book of Knowledge: The Keys of Enoch"... a visionary and practical assessment of the unimagined benefits of humankind's ultimate challenge."â " Barnet Bain, producer of What Dreams May Come and The Celestine Prophecy"... a must-read for anyone who is experiencing the energy influx and consciousness awaking that is and has been occurring on Earth."â " Rollin McCraty, PhD, director of research at the HeartMathResearch Center and cofounder of Global Coherence Initiative"... dares to cross the boundaries of the scientific paradigm to successfully unveil the links between solar activity, the center of our galaxy, and our spiritual and genetic evolution."â " Alan Brain, communicator, documentarian, and independent researcher at Losdivulgadores.com"... speaks both to the emerging consciousness of humanity and to the inherent truth that resides in each of our hearts . . . profoundly important to anyone who is troubled by whatâ™s going on with our Earth and its inhabitants, yet simultaneously moved by hope for a better world."â " Robert Williams, founder and chairman of Clarus and creator of Qlink/Sympathetic Resonance Technology"Dieter Broers reviews, for the great public, reports and theories on a very timely topic. The take-home lesson, based on the language of copernicisms in and around us, is that the association of human mentality with either planetary or interplanetary magnetism is significantly probable."â " Franz Halberg, MD, codirector of the Halberg Chronobiology Center at the University of Minnesota"[T]his book was extremely hard to put down... Broers presents a strong argument with heavy research that solar flares effect mankind and civilization more than we suspect."â "Dreamspeaker"Broers demonstrates that indeed, solar activity does physically create microscopic changes in our brain structure and how landmark historical events (most recently, the 'Arab spring') have coincided with heavy solar flare activity."â "Zack Kopp, Examiner.com"[I]t's thoroughly refreshing to come across a scientist who neither professes that he knows all the answers nor is dogmatic in the presentation of his ideas. His investigations into the effect of electromagnetism on human consciousness, DNA and the planet were both frightening in their possible effect but equally exciting in revealing the opportunities for fundamental changes to human consciousness...I wholeheartedly recommend it." â "Peter Morris,

Dieter Broers has conducted research in the fields of frequency and regulation therapy since the 1980s. He headed an interdisciplinary research project, funded by the Federal Ministry for Research and Technology, whose groundbreaking findings were used for the development of completely new therapy devices for medical research. Broers has been granted patents in 85 different countries and was invited to become a member of the International Council for Scientific Development (ICSD), whose members include 100 Nobel prize winners. He is a member of the Committee for International Research Centres and has, since 1997, been a biophysics director at the ICSD.
